

# ROUGHING CUTTERS FOR MARBLE AND GRANITE

## INTRODUCTION

The introduction of diamond in the treatment of surfaces in the natural stone industry has revolutionized the way of working, allowing a greater production of the lines of calibration and polishing and significantly improving the finish of the processed slabs.

We develop alloys and machine processes to obtain perfectly balanced crowns, always looking for the best grinding, performance and finishing results.

## CALIBRATING ROLLER

The calibrating roller is tailor made both in its dimensions for its adaptation to the machine and in the type of segment for the material to be worked: The rectified and revolved allow that its start-up is immediate and its results from the first moment optimal.

This is the only way to work in the granite, terrazzo and stoneware industries, with high-production transfer machines.

## PROFILE GRINDING WHEEL

It is the alternative to the calibration roller. Its abrasion power makes them unbeatable for roughing up to 4 mm. at the same time that a perfect calibration is obtained and an optimal roughing for the beginning of the polishing.

As in the roller, its manufacture is made according to the user in both dimensions and technical characteristics of the segment for the material to be worked:

Specially indicated for the recess and calibration of the terrazzo in transfer machines.

# TOOLS

**1. CORE DRILLS**

**5. DIAMOND BLADES FOR NATURAL AND ARTIFICIAL STONES**

**10. SURFACE PREPARATION**

**2. FLOOR SAW BLADES**

**6. DIAMOND WIRE FOR NATURAL STONE**

**11. DRY CUTTING BLADES**

**3. WALL SAW AND PRECAST DIAMOND BLADES**

**7. POLISHING TOOLS FOR NATURAL STONE**

**12. TABLE SAW BLADES (WET CUTTING)**

**4. DIAMOND WIRE FOR CONSTRUCTION**

**8. ROUGHING CUTTERS FOR MARBLE AND GRANITE**

**13. GRINDING RINGS FOR CALIBRATING**

**9. GANG SAW FOR MARBLE AND SANDSTONE**

**AUTHORIZED SELLING POINT**

**SOLGA**  
DIAMANT
